

GLOBALTEX

FINE LINENS

WHO WE ARE

Globaltex Globaltex Fine Linens was founded by Ramazan Patak in 2015. his vision was to give the hospitality industry a product that would surpass anything that they had ever used before. He began development for such a product when he realized the drastic need for Luxury linens that would hold up against commercial-grade washes. Traveling back to Denizli Turkey, known as the textile mainland of the world, He began to work closely with the manufacturer in the area to bring his vision to life.

MISION STATEMENT

Globaltex Fine Linens aims to revolutionize the hospitality industry by offering the best that Turkish and US cotton has to offer. We continually strive to exceed our customer's expectations b developing and designing new and improved products to make everyday life easier.

VISION STATEMENT

To bring higher quality sustainable products to the front line of every good nights sleep

Regarding our certificates, we are proud to state that our products are 100% certified. These certificates show that our products comply with quality standards and are produced in accordance with environmental sustainability principles.

What is RFID?

RFID stands for "Radio Frequency Identification". This technology enables wireless data transfer through small chips embedded in products. RFID chips facilitate the tracking and management of products, optimize inventory control, and prevent counterfeiting. RFID systems consist of three components: an RFID tag or chip, an RFID reader, and an antenna. When an RFID reader transmits a radio signal, the tag responds with its stored data, allowing for seamless and automatic data capture without line-of-sight scanning.

RFID

What is RFID Used For?

PRODUCT TRACKING:

Allows products to be tracked and managed.

INVENTORY CONTROL:

Optimises inventory management.

ANTI-COUNTERFEITING:

Verifies the authenticity of products.

Benefits of RFID

Advanced Inventory Control: Keeps stock levels under constant control with real-time tracking.

Increased Productivity: Increases efficiency in all processes from acceptance to dispatch of products.

Reduced Error Rate: Eliminates errors caused by manual data entry.

Anti-Counterfeiting: Used to verify the authenticity of products.

RFID Chip Products from Globaltex Fine Linens

Our RFID chip products are currently available in the following product groups:

Duvet Cover Sets: Ensure that your bedding is genuine and trackable, from the warehouse to your bedroom.

Bed Sheets: Maintain inventory accuracy and prevent counterfeits with our RFID-embedded bed sheets.

Towels: Track towel usage and inventory levels effortlessly in hospitality settings.

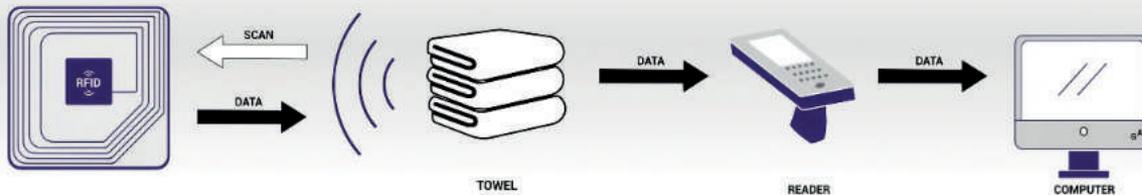

Bathrobes: Verify the authenticity of luxury bathrobes, ensuring quality and customer satisfaction.

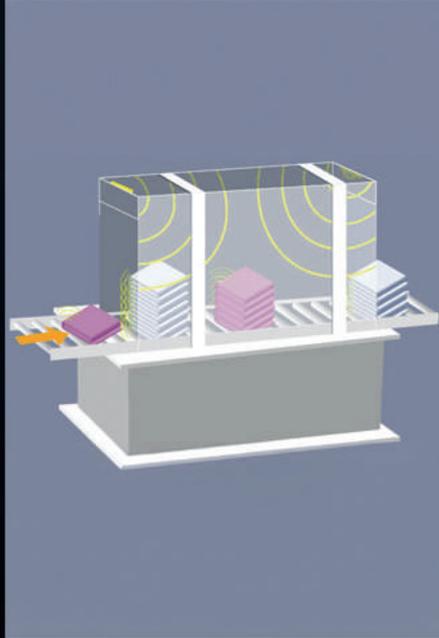

Pillows and Blankets: Keep track of these essential items in real-time, reducing losses and ensuring availability.

Latest Technology in Textile Industry

Our commitment to integrating advanced technology such as RFID into our products exemplifies our dedication to quality, efficiency and customer satisfaction. With RFID technology, we not only enhance our product offerings, but also provide you with the tools to better manage your inventory and protect your investments.

Discover the difference RFID can make to your everyday textiles and experience a new level of convenience and assurance with Globaltex Fine Linens.
